Hello Michael,

Is this a new property or is this the park adjacent the Northport school?

James,

As a follow-up have you had any conversations with Kim or Ildefonso? Both of them have also been contacted and had correspondence with the greater Northport community.

Good Morning Michael,

I was informed by Anthony Leung of NYSDEC that NYSDOH is overseeing site activities at Steers Park and you're the point of contact.

Just so you are aware, EPA received a petition letter from a resident from the Village of Northport to collect groundwater and soil samples at Steers Park due to possible releases from activity at the Northport Power Station (NPS), located just north of Steers Park.

I've been in contact with both NYSDEC, Department of Management and Materials and the Village of Northport Administrator, Tim Brojer and both mentioned a 2016 sampling of a soil pile in an area of Steers Park. The analytical results showed the soil material was clean and was later used for grade adjustment.

Can you help me understand what NYSDOH activity to date at Steers Park is? (i.e. sampling activity/investigation or consultation with the Village or County?) . I'm going to be drafting a response letter to the petitioner soon, and any information you may have is greatly appreciated.

Thank you
James Desir

James,

I checked with a couple of divisions and no one seems to know who from DEC is involved and visited the site; however, I was told that NYS DOH is overseeing the activities. The contact from NYSDOH is Mike Hughes (michael.hughes@health.ny.gov).

Tony L.
